AB - J06211675 Topical lotion contg. Sansho extract, composed of (1) dilute liq. and (2) Sansho (*Zanthoxylum piperitum*) extract of stimulation-substances e.g. Sansyol, or Sansyoamide prepd. from Sansho is new.

- The dilution liq. is pref. juice extracted from peach, or Hechima (gourd), aromatic juice of lemon, or orange, pigment-contg. liq. of Cuchinashi (gardenia), or medicated liq., e.g. garlic, or Matatabi (silvervine). The topical lotion pref. contains sex hormones e.g. testosterone. The lotion pref. contains 5-90% of Sansho extract.

- USE - The topical lotion is used as spray lotion for treating impotence.

- In an example, (1) Sansho extract soln. (28%), juice of Hechima (gourd) (67%), jasmine extract soln. (3%) and yellow colour were mixed and formed into a spray lotion. (2) Sansho extract soln. (30%), olive oil (56%), testosterone (3%), deodorant (4%), perfume (3%), colouring material (3%) and antiseptics (15) were formed into a spray lotion.(Dwg.0/0)
